KUWAIT: Ambassador of Algeria to Kuwait Khemissi Arif hosted a reception at Salwa Al-Sabah Hall recently to commemorate his country's national day.

Child rapist caught

Titas police arrested an Egyptian man suspected of raping a child in Titas. A security source said with a girl of four years old in Titas on Wednesday. The child was found seated in the yard of the house of the victim of the rape of her five-year-old daughter by an under-14-year-old person. Police managed to identify a building which was seen by some people at the time of the crime. The suspect denied committing the crime, and a sample was taken to test his DNA.

Kuwaiti woman arrested for indecency

A Kuwaiti woman was arrested after she was caught taking off her clothing and body music in the area and put and on the act and charged with public indecency.

Kuwait's 35th red tide off coast

The Environment Public Authority (EPA) is monitoring status of the recently-formed red tide spots off the Kuwaiti coast. EPA said yesterday, Mohammed Al-Ali, EPA acting director general, told KUNA the authority has been following up on this renewed phenomenon since last Saturday, when the Public Authority for Agriculture Affairs and Fish Resources confirmed location of red tide spots floating at various locations in coastal waters. Special teams have scooped up some samples for testing.

KISR to support scientific activities

KISR has signed a partnership agreement with the UNESCO to add Failaka Island which includes monuments that date back to the Bronze Age - extending through the Hellenistic civilization - to the list of World Heritage Sites.

Marking the occasion in a speech, Mutairi added that the EPI is a joint project between the Yale Center for Environmental Law and Policy and the Center for International Earth Science Information Network at Columbia University.
