WINCHESTER: Microsoft's Lorraine Bardeen demonstrates HoloLens headset as what she "sees" is projected on a screen behind her and her guide, Eric Schmidt, Executive Chairman of Google (right). The debate about whether technology is destroying jobs, "It's the same that happened to the people who lost their jobs in the United Kingdom in the 1850s or who lost their jobs in the steel industry in the United States in the 1950s. It's essentially the same kind of scenario that happened to the coal miners in the United States who lost their jobs when strip mines came in. And that might be what it takes to get people to buy a gadget. Google glass," which was surprised to see cartoon bats fly out. "They showed off a sleek prototype, they used a heavier, clunkier version..."
