Franco on ‘The Interview’

F

ranco, director and co-writer of “The Interview” and star of the film, sat down with Variety for an interview after the release of the film. The film, which was widely panned by critics and audiences alike, was released in the wake of the Sony hack, which revealed that the film was planned to be released as a Thanksgiving Day release, before being pulled from theaters.

“I’m not sure if it was a good idea to release the film,” Franco said in the interview. “I think it was a bad idea to release it, and I think it’s a bad idea that people are talking about it. It’s a bad idea to release a film that was made with a lot of money and a lot of effort.”

Franco also discussed the impact of the film on his career, saying that he felt it had a negative impact on his work. “I think it’s been a bad influence on me,” he said. “I think it’s been a bad influence on my work, and it’s been a bad influence on my life.”

Franco noted that the film had been a turning point for him, and that he had learned from the experience. “I’ve learned a lot from it,” he said. “I’ve learned a lot about the film industry, and I’ve learned a lot about the movie business.”

He also talked about the challenges of making a film in the current climate, saying that it was difficult to make a film that was both entertaining and relevant. “It’s hard to make a film that people want to see, and that’s why I think it’s important to make films that are relevant to our time,” he said.

Franco ended the interview by saying that he was looking forward to the future, and that he hoped to make more films that were both entertaining and relevant. “I’m excited about the future,” he said. “I’m excited about making more films.”
