STAR TRACK

Aries (March 21-April 19)

Sorry, Aries, you need to save your daydreaming for the night since concentrating on your work needs to be your top priority today. Spacey Neptune is like a fly in your ointment, captivating you with fascinating visions that have no practical use in the present moment. Even if you wish you could extend your weekend, it's prudent to get an early start and finish your tasks before others have a reason to complain. You might grumble a bit at first, but you will be much happier later on if you're free to pursue your dreams without worrying about chores left undone.

Taurus (April 20-May 20)

As long as you don't let too many distractions pull you off track today, you can take great comfort from the orderliness imposed by the meticulous Virgo Moon. You are being given an opportunity to plant your roots in the ground, setting the stage for personal growth. Although you can dream about the future in great detail, your smartest strategy now is to tend your garden in the present moment. There will be plenty of time later on to anticipate the harvest. Don't waste energy searching for greener grass when you need to be doing the hard work that's right beneath your feet.

Gemini (May 21-June 20)

You might have a precise plan to achieve today's objectives, but a misunderstanding at work leads to confusion about your next task. Asking others for their input is tricky business because they are not giving you much information to go on. It's as if they want you to figure out everything on your own. Fortunately, you don't really need anyone to tell you what to do because you have a secret weapon at your disposal now. If you sit still and quiet your mind, your inner voice of intuition will offer you the solution in a moment of brilliant clarity. Sometimes wisdom comes from within.

Cancer (June 21-July 22)

Your cautious approach to the future often saves you from landing in trouble. However, coyly playing games while deciding what to disclose and what to withhold sends mixed signals today. People don't know how to respond when they can't figure out your intentions. However, sharing your concerns can widen your perspective if you're open to the feedback you receive. Others won't be blindsided by your actions if they are involved in your process from the start. Delay committing to a final plan until you've weighed and balanced all the alternatives alongside all the consequences.

Leo (July 23-August 22)

People might think there's something wrong just because you're not acting like your extroverted self these days. However, nothing could be further from the truth even if you can't be coaxed out of your lair today. Although you're known for your social prowess, you need time alone to recuperate from last month's dramas and celebrations. Tell others it's their turn to shine now but not to worry; your star will soon return to burn even brighter than before.

Virgo (August 23-September 22)

It's nearly impossible to be efficient when you believe you're not getting the full story. It's as if people are keeping you out of the loop because they don't want to distract you from your work. However, your concentration wavers if you start to think that you don't know the whole truth. Stop obsessing; you can do your best work now by shifting your focus inward without worrying about anyone else. Paradoxically, your self-reliance deepens the bonds between you and your peers when they realize your determination is golden.

Libra (September 23-October 22)

You're all business today and aren't interested in sharing your feelings with anyone. Because you're naturally so susceptible to the well-being of others, you're afraid of opening the proverbial emotional door while the evocative Moon is hiding out in your 12th House of Privacy. Unfortunately, your coworkers might take your aloofness personally, wondering what they did wrong. But your need for personal space isn't up for discussion; you just don't want to show your vulnerability now. Keep your nose to the grindstone and let people judge you for your actions rather than your words.

Scorpio (October 23-November 21)

You prefer to keep what's most important to yourself unless you're talking with someone who can truly understand your passion. As much as you long for the support of your peers, you're tentative when it comes to sharing your creative urges now because you're afraid that someone might belittle your ideas. The solution to your dilemma is not to go quiet; the key is to find the right person to confide in today. Connecting with like-minded souls who are walking similar paths empowers you to move mountains on your way to manifesting your dreams.

Sagittarius (November 22-December 21)

You might be unsure about your evolving direction because the Cancer New Moon rattles your 8th House of Transformation, evoking a sense of discomfort by pushing you to explore feelings that you would rather forget. Don't belittle a friend's melodrama by judging it so trivial that you don't have to get involved. Your willingness to partake in a meaningful dialogue may be exactly what's required to take a relationship to a new level of intimacy.

Capricorn (December 22-January 19)

Responsibility is relentlessly calling, demanding that you put your plans for the future on temporary hold while you manage a minor relationship crisis today. Although you're bewildered by the emotional dynamics, you probably recognize that it will be a much simpler affair to handle the situation now before it festers into something ugly. Nevertheless, your dreams won't go away just because you are busy putting out fires. Thankfully, reshuffling your priorities might be the trick that allows you to balance all the variables in your life.

Aquarius (January 20-February 18)

There's no reason to engage in a power struggle over allocating resources now, even if you're worried about completing a big project. Instead of wasting precious time in a petty dispute over things you can't control, just continue to work diligently and keep your mouth shut for the sake of harmony. Thankfully, it's not difficult to acquiesce on the details because you're already thinking about the bigger fish that must be fried later on. Nothing will be gained by allowing anyone to redirect your focus today. Keep your eye on the prize and everything will turn out fine.

Pisces (February 19-March 20)

Everyone seems to be in a more serious mood than you today, but it's probably not in your best interest to rock the boat. Unfortunately, you could work yourself into a state of frustration if you try to share your playful creativity with the world. Nevertheless, it's still prudent to follow the low-key tone set by others so as not to ruffle any feathers. Happily, respecting people's need for peace and quiet doesn't have to detract from your enthusiasm. You can still sing your song without shouting it from the rooftops.
