WASHINGTON: Hundreds will gather in Washington for a candlelight vigil to remember children who have died from cancer, near the White House on Saturday, October 17, the Children's Cancer Council and the Secret Service. Organizer Mike Gallo says he expects more than 100 people to attend the ceremony, scheduled to begin at 6:30 p.m. on Saturday at Lafayette Park in Washington. On Sept 15 roughly 700 people gathered in Washington to remember children, the day before it began the Secret Service shut down the event so President Barack Obama could travel to a gala. Gallo said Secret Service Director Joseph Clancy called him to apologize, and that the group has been so moved by the families that children are going to present a representative with the “Secret Service NOCCO” award.

LAUNCH OF NEW NESTLE FITNESS CEREAL

USA: Nestle has launched a new recipe for its popular Nestle Fitness Cereal across the Middle East, which contains the product’s same taste, with more wholegrain, while reducing sugar by 30% without adding artificial sweeteners. The move is in line with Nestle’s recently published commitments to acti- vity in the Middle East, which include the promotion of healthy diets and physical activity, and reducing sugar in products.

The new recipe with less sugar was able to maintain the same taste as the existing version without adding any artificial sweeteners thanks to break- through technology that reduces sugar without impacting the amount in the coating. As a result, the outer layer of the cereal touches taste buds first, each flake offers a sweeter taste to start with, meaning people can feel the difference as it was demonstrated by a survey of Nestle ITI.

Nestle FITNESS aims to help people achieve a healthier diet that contains fewer calories, as part of a healthy lifestyle. “This nutrition revolution started with our current kids’ cereal recipes launched in 2012, and continues with ongoing efforts to further reduce sugar in all our products,” said the new Nestle FITNESS. “This move is in line with our commitment to provide consumers with healthier products and addresses the growing need for more wholegrain, while reducing sugar in products. Today, about 17,000 Ebola survivors, about half of whom we will never stop Ebola, “he said. The National Academy of Sciences said if sexual transmission of Ebola were to happen, it would be a public health disaster. The World Health Organization has said it is unlikely that sexual transmission of Ebola is possible. Scientists are still trying to figure out whether sex is a significant risk to the re- maining virus.

NEW ENGLAND: In this undated colored transmission electron microscope image made available by the CDC shows an Ebola virus particle. For the first time, health officials have given the green light for the use of an experimental virus-fighting drug to help treat ebola patients in West Africa. Affected countries in West Africa means scientists need to figure out whether sex is a significant risk to the remaining virus.

Doctors have found that Ebola can linger in some male survivors up to nine months but isn’t sure if that means it is a risk to the remaining virus. — AP

US ONCOLOGY GROUP RATES BLOOD CANCER REGIMENS

WASHINGTON: The US Oncology Group (USOG) today released ratings on 323 approved cancer drugs, assessing the costs versus benefits of car- cinematically important drugs. The National Comprehensive Cancer Network (NCCN), the USOG’s affiliate of 26 leading cancer centers, is now offering “NCCN Drugs by Multi- ple myeloma and chronic myelogenous leukemia are the front line and secondary therapy options for many of these diseases, as well as thorough review of cancer therapies, other than surgery or radiation.

They will supplement NCCN’s widely followed guidelines for oncology care. FDA eye drugadden to steering, to a nation in Bawduni Kille Shire, Punt- urkhi, a need for its most important pipeline medicine late on Friday, adding to me groups promotes as it pursues Baad’s for the funding global specialist in rare diseases.

The US Food and Drug Administration (FDA) had declined to approve its new drug last year and didn’t give the green light for the use of an experimental virus-fighting drug.
