

NEW DELHI: The new Delhi government has reduced the number of days for which it will be enforcing a ban on private vehicles in the city to tackle the pollution crisis. From today, the ban on private vehicles will be enforced from 8 am to 8 pm on Tuesdays and Saturdays. The ban will not apply on Sundays.

A greater proportion of groomers, 14 percent, reported having had an STI during their lifetime, than non-groomers at eight percent, the study found. For extreme intensity groomers, the percentage was 16 percent.

The results are also consistent with previous studies that showed an association between grooming habits and HIV infection rates. The researchers noted that the study’s findings on the relationship between grooming and STIs are consistent with other studies that have shown a link between grooming and HIV.

In this photograph taken on September 8, 2016, bushfire smoke washes their charred faces after forests were destroyed by wildfires close to the city. A 223 million cubic meter dam was created by the government in the late 1970s to prevent the release of toxic gases into the environment and to provide drinking water for the city’s population.
