SHANDONG: The first miner (centre on hoist) is lifted from a collapsed mine in Pingyi, east China’s Shandong Province. — AP

were rescued the day after the accident. There has been no communication with 13 other missing miners. The incident involves late Friday, a “miracle” rescue in a country with a history of dangerous mining incidents.

Four miners trapped underground for 36 days in a collapsed Chinese gypsum mine were pulled out late Friday, a “miracle” rescue in a country with a history of dangerous mining incidents. The four rescued men were shown being wrapped in white bedsheets, and seen smiling at the camera as they were lifted to the surface one by one in a rescue “capsule,” according to state media.

The four were among 23 trapped when the mine collapsed on December 25. But the rescue was over for 19 of them when local government officials said that 19 miners were killed, who were trapped in the mine and could not be rescued. There were 23 miners trapped underground when the mine collapsed, and 19 of them were killed, authorities said.

The mine, located in the eastern province of Shandong, is owned by a company that is also responsible for the safety of the workers. The company said it was working to recover the bodies of the miners as soon as possible.

Miners trapped under the surface. The rescue operation is still ongoing, and the cause of the collapse is under investigation. The mine is located in a mountainous area, and the rescue efforts are facing challenges due to the difficult terrain.

The rescue operation was carried out by a team of rescue workers and engineers, who used specialized equipment to dig a path to the mine. The mine is located in a remote area, and the rescue workers had to travel long distances to reach the site.

Unfortunately, we haven’t heard from the three missing miners’ Zhang Shuhua, mayor of the city of Pingyi, who gave an emotional press conference on the evening of December 25, 2015, expressing his hope that all the miners could be rescued.

The three miners were trapped in the mine for over 20 days, and their families and friends have been waiting anxiously for news. The local government has been working to rescue the miners as soon as possible, and has been providing support to the families of the trapped miners.

Guan Qingji, 58, and Hua Mingxi, 36. “Thanks, “ Guan Qingji was quoted as saying while being hoisted off the damaged area. Other trapped miners were also rescued, including Song Mengming, 45, and Liu Guoqing, 40, who were also rescued.

The mine is located near a coal mine, and there have been previous accidents at the site. The mine is owned by a state-owned company, and the government has been working to improve safety standards at the mine.

In December 2015, thousands of miners and their families gathered outside the mine to demand the rescue of the trapped miners. The government has been working to improve safety standards at the mine.
