UNfortunately, the legal aspects crowd many of the biggest issues in Kuwait from an international perspective. Fortunately, it is also one of the most improved legal sectors.

Kuwait: Labor law was changed in 2010 when the government and parliament joined hands in order to come up with a comprehensive legislative solution to the issues that were then discussed. Because Kuwait has a unique democratic pattern where the majority of legislations are not people-centric, it is hard for an ordinary person to know if he or she is protected or not. However, it is highly important to be aware of the circumstances that relate to your life and your own safety. As of now, there are many regulations that are not easy to grasp and keep. Therefore, I know I have repeatedly discussed labor law from a different perspective. Fortunately, however, it has also been discussed by many legal practitioners among the biggest issues in Kuwait from an international perspective. Furthermore, Kuwait has the capacity of serving 64 senior citizens. This would help a lot of people.
