DINOSAURS BEHEADED AT AUSTRALIAN MUSEUM

PHANTOMS: In 1969, the State of Victoria began experimenting with a new form of treatment for lung cancer. The treatment involved the use of a high-energy beam of X-rays to destroy cancer cells. The treatment was successful in destroying cancer cells, but it also caused severe damage to the lungs. The treatment was eventually abandoned because of the side effects.

SUDAN CANCER DOCTORS EYE SANCTIONS REFERENCE PATIENTS

Long waiting lists

The Khartoum cancer hospital announced it will retire its dolphins into a “pioneering” ocean pen by 2020. The announcement followed a call for the animals to be retired to a sanctuary in the United States. The hospital said it would like to see the dolphins transferred to a sanctuary in the United States, but it is unclear whether this will happen.
