**China to launch own encyclopedia to rival Wikipedia**

China plans to launch its own online encyclopedia next year, hoping to build a "symbol of the country's cultural and technological achievements," its official Xinhua News Agency said. Preparations for the encyclopedia, which is set to be known as the "Chinese Academy of Sciences Encyclopedia," is underway, according to the agency, which published the article on the website of the Chinese Academy of Sciences.

The new encyclopedia will address the growing publicity over an online encyclopedia launched last month on the website of the Chinese Academy of Sciences. The Xinhua website also noted that the encyclopedia is designed to be "the largest, most complete, most comprehensive and most authoritative digital encyclopedia in China for Chinese scholars."

**Microsoft**

"We have a goal to build the world of tomorrow, to create the world of tomorrow, and we're really focused on education,” said Microsoft’s Chief Education Officer, Erin Gudberg. "Microsoft is helping empower educators with a whole new set of tools to create curriculums for the classroom to teach digital citizenship, inspire creative problem-solving, and encourage learning. The company is providing critical tools for students and teachers to build a digital future together."
