Ooredoo reiterates commitment to supporting entrepreneurs

First activity in symposium on November 21

Ooredoo, the international Ooredoo Group based in Doha, Qatar, explained that Ooredoo's products and services are tailored to the needs of customers and businesses. Ooredoo Kuwait -which is an enlisted company in the Kuwait Stock Exchange Market - operates a number of telecom service providers in the region, such as 21st Century, Kuwait Wireless, and Kuwait Wireless Youth, and the Kuwait Petroleum Corporation. From his end, Founding Chairman of the Association of Small and Medium Enterprises stated during the press conference that the Association is committed to organizing and delivering the symposiums to help lift past and recent experiences of SMEs. He stressed that the initiative will open the doors from large to small to provide full-fledged services to SMEs, which will push them to complement each other.

Ooredoo's operations in Kuwait date back to December 1999 when it launched wireless services as the second operator. The company today provides broadband, mobile, internet and corporate managed services tailored to the needs of customers and businesses. Ooredoo Kuwait - which is an enlisted company in the Kuwaiti-Neddi Exchange Market - operates a number of telecom service providers in the region, such as 21st Century, Kuwait Wireless, and Kuwait Wireless Youth. Ooredoo Kuwait is a member of the international Ooredoo Group based in Doha, Qatar. (For the onlinesyndication the Event is: the National

UK to have driverless cars by 2021

LONDON: British finance minister Philip Hammond announced a £400 million ($59 million, 48 million euros) funding for Artificial Intelligence and plans to put driverless cars on UK roads by 2021, in his budget speech. The minister, who is under pressure to boost economic growth, vowed to allow Britain driverless car industry, which the government estimates will be worth £28 billion ($36 billion) by 2035, to get cars on the road within the next three years. In his budget, the minister described an effort to deliver an eye-reading autonomous vehicle.
