As part of the event, the two partners discussed the Internet of Things, and Artificial Intelligence, and sparks bot fears

Ericsson's clouds flay as Swedish telecom giant caps losses

Ooredoo and Huawei discuss 5G, IoT, and AI

Ooredoo and Huawei announce plans to work together on 5G and IoT technology. The collaboration aims to bring the latest 5G solutions to the market, enhancing the user experience and driving innovation in the telecommunications sector. Huawei’s expertise in 5G and IoT technology will complement Ooredoo’s strong presence in the Middle East and North Africa, allowing the companies to offer advanced services and solutions to their customers. The partnership is expected to foster collaboration on research and development, leading to the development of new technologies and innovations. The companies are looking forward to working together to unlock the full potential of 5G and IoT, paving the way for a brighter future. **KUWAIT TIMES**

Giles Rhoads attended a special session organized by strategic partner BrandSource at the recent National Furniture Market Congress 2018 held at Huawei’s Head Office in Kuwait. The session was attended by Ooredoo’s Technology and Strategy Departments, and included in-depth discussions and live demonstrations on the latest industry trends and innovative technologies. As part of the event, the two partners discussed the Internet of Things and Artificial Intelligence, which are expected to transform the way businesses operate and deliver services. The Internet of Things is projected to have substantial leading growth by the year 2020, with over 50 billion devices expected to be an integral part in a variety of sectors, such as healthcare, transportation, and services sectors.

In a statement to the press, Ooredoo announced the formation of a strong partnership that will drive the best solutions and technologies. The company expressed its pride in having worked alongside such reputable partners with strong international presence. Ooredoo is the first to adopt the latest technologies to bring the most advanced solutions in the industry to its customers.

Ooredoo further underscored the deep ties between the two and Huawei, whose role was instrumental in various projects to bring the best products and services to the market. The partnership will continue to build on the existing relationships and attract more customers in Kuwait. This stems from Ooredoo’s
