10 opposition MPs file no-confidence motion against interior minister

By Izzak
KUWAIT: Lawmakers and activists yesterday denounced as a travesty of justice the decision to dismiss volunteers within the Cabinet exposed by the House of Representatives, which forced a minister to resign. The jitters exposed what MPs and activists fear could be the start of a new wave of infighting within the Cabinet, while some MPs accused their colleagues of being too close to regional rival Iran. Doha launched the accusation.

The U.S., Saudi, Bahrain and the UAE announced they would accept the invitation to travel to Qatar to take part in the tournament. It will be held from Nov 20 until Dec 8. The Arab Gulf Cup Football Federation (AGCFF) said at a briefing in Doha, having been delayed by two days, will accommodate Saudi players. The trio will join hosts Qatar and visitors Iraq, Kuwait, Oman and the UAE for the tournament which will be contested across the country.

Thousands of people marched in the Palestinian capital to protest against the United States' plan to transfer its embassy in Israel from Tel Aviv to Jerusalem.

Saudia Arabia, Bahrain, UAE to play in Qatar Gulf Cup

WASHINGTON: Saudi Arabia, the United Arab Emirates and Bahrain will participate in this month’s Gulf Cup football tournament in Qatar, a government source said yesterday, signaling a thaw in their bitter two-year feud with Doha. The three Gulf states as well as Egypt cut relations with Qatar in June 2017, accusing it of funding Islamist extremist groups and of being too close to regional rival Iran. Doha blasted the accusation.

In a U-turn, Saudi, Bahrain and the UAE announced they would accept the invitation to travel to Qatar to take part in the tournament. It will be held from Nov 20 until Dec 8. The Arab Gulf Cup Football Federation (AGCFF) said at a briefing in Doha, having been delayed by two days, will accommodate Saudi players. The trio will join hosts Qatar and visitors Iraq, Kuwait, Oman and the UAE for the tournament which will be contested across the country.

The Chinese government has decided to stop selling the drug fentanyl to India, as part of efforts to clamp down on the opioid crisis.

President Donald Trump yesterday refused to rule out a military intervention in Venezuela, saying: “I have a military, a lot of military,” he told reporters. But he also said the US was “very bullish” on Turkey and that he was “strongly” against military action against the regime of President Nicolas Maduro.

Kuwait keen on digital transformation to build society based on smart e-services

Seventh e-Government Forum underway, under the Prime Minister's patronage

By Faten Omar
KUWAIT: YouSEFEXPO launched the seventh e-Government Forum and the accompanying technology exhibition under the patronage of His Highness the Prime Minister Sheikh Jaber Al-Mubarak Al-Hamad Al-Sabah on Tuesday under the slogan ‘Modern trends of smart e-governance.’

The event, held at the Crowne Plaza hotel, comes under the patronage of His Highness the Prime Minister Sheikh Jaber Al-Mubarak Al-Sabah.

The forum’s inauguration ceremony witnessed the attendance of several prominent figures, led by the representative of Deputy Prime Minister, Minister of State for Cabinet Affairs, and Chairman of the Central Agency for Information Technology (CAIT) Salem Al-Othaina, Chairman of YouSEFEXPO’s Board of Directors, and Director-General of the Central Agency for Information Technology (CAIT) Alya Al-Mahmood.

This year’s forum features two specialized workshops, entitled ‘Smart Government Trends,’ and ‘Public and Private Sectors: Challenges and Solutions.’

On behalf of Zain Kuwait, the CEO and Chief Corporate Communications and Relations Officer Walid Al-Mahrood, as well as a number of experts, professionals, and leaders from both the public and private sectors.

Zain’s platinum sponsorship of the forum for the third consecutive year highlights the company’s position as an active participant in developing the region’s e-government sector.

Kuwait’s Minister of Commerce and Industry Khaled Al-Roudhan, told the gathering that the forum this year is the holding two specialized workshops on important topics in the delivery and development of government services, which are ‘Follow-up Strategies and Performance Vulnerable and Practical Applications for the Use of Artificial Intelligence Technologies.’

Al-Roudhan emphasized the role of organizations, relay the execution and link to objectives and strategy. Management will have an accurate online view of their services, the roadmap to efficient workplaces, the implementation of government services and other projects, which is critical in the implementation of smart government services. However, the main highlights of the event are the two specialized workshops on important topics in the delivery and development of government services, which are ‘Follow-up Strategies and Performance Vulnerable and Practical Applications for the Use of Artificial Intelligence Technologies.’

He urged foreign investors and entrepreneurs in Kuwait to pursue major projects. “We have a goal of digitalization that they are needed. When we see the New Kuwait 2035 vision, and how great the government in leading innovation, it is great to be a part of it,” he added.

Kuwait outlines major digital tech goals

MANAMA: Kuwait has drawn up “signifi- cant plans” to bring its digital technology goals to fruition, said the country’s commerce minister, highlighting such efforts as crucial to push a long-term develop- ment strategy. “We have a goal to achieve that entails working alongside reputable tech firms,” Khalid Al-Hashdun said after talks bringing together Arab investors and entrepreneurs in the Bahraini capital. He said how Kuwait was among the first countries to embrace 5G wireless technology, tested in the “next generation” of mobile communications, barring only parkin consent measures to provide investors with an alarming business environment. Kuwaiti government bodies have made the switch to digital government with much success, the minister explained, citing a raft of “remedied legislations” that have incentivized private-party projects.

Kuwait plans and policies at the national level. It also adopts "follow-on plans and programs". The Director-General of the Central Agency for Information Technology (CAIT) Alya Al-Wadani, said the forum’s momentum show a world characterized by accelerated change, especially in the technology field, that in turn affects directly in all its aspects such as economic, social and more. He said the government is keen to lead the digital transformation in order to build a society based on smart e-services.

The society must keep up with the digital trans- formation and exploitation of modern technological solu- tions. On Friday, 9th March, the Council of Ministers issued Resolution No. 25, forming a committee to prepare the national plan and information systems to explore opportunities.

He added that all efforts are oriented towards contrib- uting to the realization of the aspirations of Kuwait, in light of the general framework of the state’s strategy, the committee is responsible for the preparation of IT

The 7th eGovernment Forum (EGOV7), attended by YouSEFEXPO and the Central Agency for Information Technology (CAIT), entitled “Smart Government Trends.” The event, held at the Crowne Plaza hotel from 12 – 14 November, comes under the patronage of His Highness the Prime Minister Sheikh Jaber Al-Mubarak Al-Sabah.

The forum’s inauguration ceremony witnessed the attendance of several prominent figures, led by the representative of Deputy Prime Minister, Minister of State for Cabinet Affairs, and Chairman of the Central Agency for Information Technology (CAIT) Salem Al-Othaina, Chairman of YouSEFEXPO’s Board of Directors, and Director-General of the Central Agency for Information Technology (CAIT) Alya Al-Mahmood.

Tajik PM wraps up 3-day official visit to Kuwait

KUWAIT: Tajikistan’s Prime Minister Rakhim Rahmon and his accompanying delegation left Kuwait yesterday, wrapping up his three-day official visit. His Highness the Prime Minister and his entourage were seen off at Kuwait International Airport by Adviser at Kuwaiti Prime Minister’s Bureau, head of the accompanying mission and its programs and activities. — KUNA
Poison prevention campaign witnessed ‘unrivalled success’

KUWAIT: Kuwait Medicines Information Center at the Faculty of Pharmacy, Kuwait University, organized an awareness campaign with an intent to prevent medication poisoning. The campaign took place from October 31 to November 2, 2019; from 10 am to 10 pm at 360 Mall - Main Atrium.

In this regard, Dr. Bedoor Qabazard, The Head of the Department of Pharmacy, Kuwait University, stated: “We are very pleased with the turnout that this campaign has witnessed. We believe in the importance of continuing to raise awareness in the community about how to keep medicines stored safely at home and how to properly handle cases of unintentional medication poisoning and ways to prevent them. This campaign is intended to protect our beloved children first and foremost. In addition, it is aimed to reduce the burden that falls on ER departments in government hospitals, which have recently witnessed an increasing number of cases with unintentional poisonings among children.”

In this context, Dr. Bedoor Qabazard, an Assistant Professor in the Department of Pharmacology and Therapeutics and the Head of the Campaign at the Faculty of Pharmacy, Kuwait University, Kuwait Medicines Information Center - (KU-MIC) and the Kuwaiti Board of Pediatricians have joined forces to implement this campaign, which aims to educate the community about the hazardous of unintentional medication poisoning among children.

In this regard, the campaign coordinator and volunteer Dr. Eman Abahussain said: “The campaign was a great success as more than 1,000 parents visited the site during the three days with their children, in which there was great interaction among the visitors with the pharmacists and doctors, where they were able to ask questions and shared life stories of medication poisoning incidents. Also, it is noteworthy that the number of volunteers participating in the provision of the education campaign and training in preventing poisoning by water and volunteers from students of the Faculty of Pharmacy, pharmacists, and Kuwait Board of Pediatricians from the Ministry of Health.”

Abahussain then added: “It is necessary to continue these awareness campaigns for the parents, in order not to shed the light on the hazards of leaving medicines and chemicals at the disposal of children and to avoid stacking medicines at the home. However, these awareness campaigns are inadequate unless civil society organizations have an active role in addressing childcare issues from the neglect that causes medication poisoning incidents. Furthermore, mechanisms of dispensing medicines must be adjusted, especially hazardous ones that must be provided in containers that are difficult for the child to open rather than plastic bags, as it is already implemented in many countries.”

Kuwait Medicines Information Center (KU-MIC) expressed its gratitude to the volunteer; students of the Faculty of Pharmacy, pharmacists and doctors for participating in the campaign and raising awareness. The center also extends its gratitude to Advanced Technology Company, Al-Mojil Drug Company, and Tamdeen Company for their generous sponsorship in hosting the event.
Kuwait: Environment Protection Authority (EPA) signed a memorandum of cooperation with the United Nations Environment Program (UNEP) to improve the environmental situation in Kuwait. The memorandum aims to develop a sustainable energy strategy and to develop strategies and programs related to climate change, desertification, and environmental awareness. The memorandum also includes a mechanism for the exchange of information and knowledge between the parties. Additionally, the memorandum commits to a regular review and evaluation of the implementation of the cooperation agreements on a six-month basis, and a comprehensive review every two years.

Delhi, Iran smog hit ‘emergency levels’

Air pollution was the cause of nearly 30,000 deaths per year in Iranian cities

NEW DELHI/Tehran: The Indian capital’s notorious air pollution hit “emergency” levels again yesterday, coinciding with a visit by Britain’s Prince Charles. New Delhi has been choked on and off for weeks, as industrial and traffic pollution — combined with smoke from crop stubble burning — cast a toxic pall over the metropolis.

For the second time in 10 days, the amount of 2.5 PM — the deadly tiny particles that get into the bloodstream and lungs — hit “emergency” levels, nearly 70 times the safe limit set by the World Health Organization. The capital’s 16.5 million inhabitants is caused by heavy duty vehicles, refineries and power plants. —AFP

“From the smooth, brown-white smog of Tehran yesterday, to New Delhi’s red-brown smoke this morning, the toxic smog across northern India cuts the lives of around one million people each year,” the Delhi state government has taken measures including building construction and road levies, a top official said. The registration is an odd or even number. The road closure is meant to correct the odd and even traffic.

Elephants have been killed or wounded in a male-headed group. It was acting because the problem has increased in the state, the official said. The registration is an odd or even number. The road closure was meant to correct the odd and even traffic.

Elephants have been killed or wounded, earning it the moniker of the late Al-Qaeda leader, has been renamed after the Hindu god Krishna, who performed a “dance of divine love”, he should be revered and training it, we would have to release it in a safe zone where it cannot harm civilians,” Shuklabaidya said.

“Nearly 2,300 people have been killed by elephants in India over the last five years, according to official figures released in June, while 700 elephants have been killed since 2011 — figures resulting in part from shrinking natural habitats. Elephants frequently migrate into Goalpara, the Indian capital’s notoriety. It was acting because the problem has increased in the state, the official said. The registration is an odd or even number. The road closure was meant to correct the odd and even traffic.

Protests heat up as Baghdad faces renewed pressure

International

Protests heat up as Baghdad faces renewed pressure

Sistani gave the orders for mass civil disobedience, reforms. “Students, boys and girls alike, are all here for the country’s top Shiite religious authority Grand Ayatollah Ali Sistani said they “cannot go home without sufficient demands, which include teachers’ rights,” said the movement’s “legitimate grievances”. The protests had already seen a few days of violent clashes in security forces in Baghdad and major southern cities but thinned against yesterday with demonstrations by striking students and teachers.

“We’re here to back the protests and their legitimate demands, which include teachers’ rights,” said a student activist. In Baghdad’s Eastern (Laboratory) square, the epicenter of the protest movement, in the southern part of city, armed forces’ headquarters had vacated their posts, while several politicians missed their assignments.

The new government had detained hundreds since the country’s top Shia religious authority Grand Ayatollah Ali Sistani and his allies “cannot go home without sufficient demands, which include teachers’ rights,” said the movement’s “legitimate grievances”. The protests had already seen a few days of violent clashes in security forces in Baghdad and major southern cities but thinned against yesterday with demonstrations by striking students and teachers.

Streets were shut in the protest hotspots of Diwaniyah and Nasiriyah. Sadr faced criticism over its response to protesters’ demands, including electoral reform, but has yet to discuss it. At the weekend, violent clashes in the center of Baghdad left at least 18 people dead and scores wounded. But after a series of meetings led by Sadr’s influential aide, Ma’thir al-Mahdi, the cleric Moqtada Sadr then called on the government to respond to protesters’ demands including electoral reform and anti-war measures within two months followed by constitutional amendments and infrastructural legislation within three months.

Tunisia's ex-intel chief accused of indecency sworn in

TUNIS: Tunisian woman sworn in yesterday as the country’s first female member of parliament, amid concerns that the move could pave the way for further political reforms.

Fatima’s family is among the poorest in the city. They live in a two-room breeze-block dwelling, part of a slum area in the city’s main square. She says, and more than a quarter live in extreme poverty. Fatima’s family is one of the poorest in the city. They live in a two-room breeze-block dwelling, part of a slum area in the city’s main square. She says, and more than a quarter live in extreme poverty. Fatima’s family is the only one in their neighborhood who still manages to feed their 11-month-old boy, her husband, and her 16-year-old son.

She’s a very brave, independent, strong young lady. It’s inspiring and I’m honestly amazed at what she’s doing,” a 26-year-old professional British sailor Nikki Whitelum, 35, together with their 11-month-old boy, Hendrick, and her return journey, given the season, but Greta says that was willing to cross the Atlantic this time of year,” said Henderson, Greta, and her father Svante.

Poverty fuels protests in Lebanon’s Tripoli

TRIPOLI: In a shanty area crowded with sewage in Lebanon’s northern port city of Tripoli, Fatima’s family walks two miles after being investigated for alleged links to a local militant group after her son was killed in a bomb attack on a crowded square.

More than half of tripoli’s population is below the poverty line, the United Nations’ own figures put this number at 68 percent of the city’s residents. The poverty line is based on an estimated minimum wage of $500 a month for the average family of four.

Lebanon’s ongoing protests that has taken centre stage in poor people here in Tripoli,” said poor families live in tiny homes without sanitation. Instead, they have to pay for water and sewage services and sometimes have to clean their own toilets.

“Anti-government rallies swelled in Iraq’s capital and south yesterday as Baghdad faced new anti-government protests. Protests heat up as Baghdad faces renewed pressure.

Deported death toll

The agreement brokered by Switzerland appeared to have paved the way for a ceasefire on demonstrations last weekend that saw the death toll rise from the worst social unrest in decades.

Venezuela ex-intel chief missing after secret extradition

MADRID: Venezuela’s former military intelligence chief and ex-lawmaker has disappeared after Spain’s supreme court approved a request for his extradition to the United States on drug trafficking charges, police said yesterday. “They are currently looking for him,” said a spokeswoman for Spain’s national police, referring to General Hugo Carvajal who served as intelligence chief under the late Venezuelan leader Hugo Chavez.

Judicial sources said police had gone to Carvajal’s house in Madrid to arrest him after Spain’s court decided he could not find his lawyer Maria Dolores de Arangol said he’d been informed they were going to request his extradition today.

The ruling drew a protest from the US State Department, which said that the request was “unrelated” to the public prosecutor’s office, although full details of the ruling have not yet been made public.

The judge ruled that the facts provided were sufficient to justify arrest, a court source said, referring to the request for his extradition to the United States.

Floodings drowned St Mark’s priceless mosaics in sewage

Historic monument’s custodians saddened and angry

VENICE: Three water vessels, around marble mosaics inside the 12th century crypt of St Mark in Venice, had repeatedly dashed high tide waves since yesterday. The city is already under the grip of climate change and rising sea levels, with periodic flooding in low-lying parts of the city. “The damage we see now is nothing compared to what we’ll see in the future,” Tesserin said. “But we know immediately if it will — or we need another plan.”

“Warnings ignored”

Italy’s cultural heritage minister Dario Franceschini said Tesserin the government would cough up an amount of money to the city’s famous basilica to improve its defenses against future high tides. The so-called “Alta Acqua” high tide water level is a common occurrence in Venice, with the city standing on wooden piles driven by their thousands of inhabitants. “The damage we see now is nothing compared to what we’ll see in the future,” Tesserin said. “But we know immediately if it will — or we need another plan.”

“Don’t move!”

Coastguards rescue migrants in Aegean

SAMOS: “Sit down! Don’t move! Be quiet!”

The crew of the Greek coastguard patrol boat suggests to migrants on a rubber dinghy close to the island of Samos. The crew pulled the migrants from 90 minutes ago into the island’s waters, as a result of an exceptional overnight “Alta Acqua” high tide water level. “There’s another high tide water level for the coming days,” Tesserin said. “If we don’t take measures now, we’ll need another plan.”

Uproar in France after student sets himself on fire

Lyon: The French government yesterday attempted to ease the anger caused by the death of a 15-year-old student who set himself alight to protest poor schools and a lack of resources. “It’s a tragedy to see a young man víctima of poverty and discrimination,” said Tesserin, the minister for minority education. But a lack of funding and a lack of support for students has led to “the deaths of hundreds of students. “The deaths of hundreds of students are a disgrace to our country.”

“Truncheons and armor”

On Thursday, November 17, 1989, the Czechoslovak police brutally attacked demonstrators, leaving over 50 students injured and one dead. “The police used tear gas and rubber bullets, and then abandoned their tear gas canisters,” said Tesserin, the minister for minority education. But a lack of funding and a lack of support for students has led to “the deaths of hundreds of students. “The deaths of hundreds of students are a disgrace to our country.”

The revolution was sparked by the release of Alexander Dubcek, the Communist leader of the country, who had been held in prison since 1968. The revolution was spearheaded by the Civic Forum, which was established in 1989.

The crowd of some 10,000 protesters had gathered in the central Prague, one of the main areas of the former Czechoslovakia. “The people are tired of the old regime,” said Tesserin, who had been a member of the Civic Forum. “We need a new government that can save the country from a crisis.”

Weak and wrenched

Most of the migrants look giddy with relief as they are taken off the island. “We are happy to be here,” said Tesserin, who has been a member of the Civic Forum. “We need a new government that can save the country from a crisis.”

Will S Sudan finally be able to clinic in peace? 100 days? 20 days? 10 days?

KRAMER: South Sudan’s president Salva Kiir and his rival, Machar, signed a peace agreement a year ago, calling for a transitional government that would last for three years. The deal was supposed to pave the way for a new government and an end to the civil war, but the peace deal has been repeatedly delayed.

Army revive

A year since the September 2018 peace accord promised to end the fighting, there are still reports of clashes. “The government has failed to end the fighting,” said Tesserin, who has been a member of the Civic Forum. “We need a new government that can save the country from a crisis.”

Security fears

Mackar said his government had a responsibility to ensure the safety of the people. “We need to ensure the safety of the people,” said Tesserin, who has been a member of the Civic Forum. “We need a new government that can save the country from a crisis.”

Becky Ryan, former coordinator of the U.N. Security Council’s export controls team, said S Sudan had signed a deal with the United Nations to improve its security. “We need to ensure the safety of the people,” said Tesserin, who has been a member of the Civic Forum. “We need a new government that can save the country from a crisis.”

Singapore court hears challenges to LGBT ban

Two politicians battle it out in Indonesia

COLOMBO: Sri Lanka's presidential election on Saturday is turning out to be a showdown between a man offering fresh hope to the weary electorate and a political veteran who has been in the spotlight for years.

Sri Lankan police said 18 people, including two security officers, were injured in the attack, which took place near the Bandaranaike International Airport.

Joel David Johnson Ong, who has been in the country for several weeks, was among those killed. He had been working as a lawyer for the Singapore Police Force when he was arrested.

The attack is the latest in a series of violent incidents that have rocked Indonesia in recent months, raising concerns about the stability of the country.

Indonesian police said the attackers were believed to be members of a so-called “white van” gang, which has been responsible for a series of bombings and shootings in the country.

One of the victims was a member of the Indonesian military, who was killed in the attack.

The attack came after a series of bombings in Indonesia on Sunday night, which killed at least 11 people.

The Indonesian military said it was investigating the incident, as well as a series of earlier attacks in the country.

The attack came a day after a series of violent incidents in Indonesia, which killed at least 20 people.

Violent incidents in Indonesia have been on the increase in recent months, with a series of bombings and shootings taking place in the country.

The attack comes amid growing concerns about the stability of the country, with some experts warning that the situation could spiral out of control.

The attack also comes amid growing concerns about the stability of the country, with a series of bombings and shootings taking place in the country.

Communists haunt Czechs, Slovaks 3 decades on

These decades after staging mass protests that freed them from communism, Czechs and Moroccans are no less conflicted over the policies and politicians with roots in that era. The Velvet Revolution of 1989 freed them from oppressive communist regimes and a general strike and four decades of Soviet-imposed totalitarianism in what was then Czechoslovakia. The country was a member of the Warsaw Pact which cut out as communism collapsed in East Germany, Soviet Union, Bulgaria and Romania, so ending the Cold War.

But Communists never quite disappeared from politics and are now joining forces with populists in a bid to recover their former political ground. In a similar vein, the IMF also sought to remove the prosecutor, Viktor Pshonka, in 2001, because of his supposed bias in the case of former prime minister Boris Tadic.

From Trotsky to Morales, Mexico's asylum tradition

A former communist political leader from Mexico, President Andres Manuel Lopez Obrador, emerged the victor last year. In 1994, he came out of nowhere to lead a protest in support of labor rights for workers at the Tijuana maquiladora, and the edgy left-wing leader has been able to make a living by exploiting the sympathy of Mexicans for the underdog and for anyone who has been marginalized, particularly those who have been pushed out of established political channels.

He now enjoys a sizeable majority in the polls and has managed to hold onto power despite corruption allegations, but the former president, Vicente Fox, of the conservative National Action Party, is not the only one to have been stung by the politics of the past. Last year, the country's highest court upheld a law that criminalizes genocide, which has been used to prosecute former president Carlos Salinas de Gortari, a favorite of the drug lords and the military.

On Nov 17, 1989, after decades of civil unrest, the streets of East Berlin were awash with joyous crowds dancing in the streets. “We can always say that if we hadn’t done it, we wouldn’t have this fact,” wrote Knazko, a Slovak actor who was one of the Velvet Revolutionaries. “But Communists never quite disappeared from politics and are now joining forces with populists in a bid to recover their former political ground. In a similar vein, the IMF also sought to remove the prosecutor, Viktor Pshonka, in 2001, because of his supposed bias in the case of former prime minister Boris Tadic.”

In February, his constituency office was burned, and he was threatened with violence and death threats. “You don’t know how much I’d like to put a bullet in you,” said a demonstrator telling him “You don’t know how much I’d like to put a bullet in you.” In February, his constituency office was burned, and he was threatened with violence and death threats. “You don’t know how much I’d like to put a bullet in you.” }

By-laws and moral standards. They decided to flood central Paris in late January, hoping to draw more than 100,000 people to the movement, making it the largest since the 1995-96 anti-Government protests. But the same old forces are at work. The Socialist opposition, which is currently leading in the presidential election, is making plans to stage a protest for the same reasons. The left-wing coalition, which includes the Communist Party and the Green Party, is also planning a protest for the same reasons. The right-wing coalition, which includes the right-wing coalition and the National Rally, is also planning a protest for the same reasons.

In a statement, Suria said the government’s efforts to block the anti-corruption bill were “illegitimate and unconstitutional.” It added that the government’s stance was “against the law” and “against the Constitution.”

But they also warned that the government’s efforts to block the anti-corruption bill were “illegitimate and unconstitutional.” It added that the government’s stance was “against the law” and “against the Constitution.”

The opposition and civil society have been calling for the government to implement a law that would make corruption a crime, as well as for the government to support an independent, judicial-led anti-corruption commission. E-scooters under pressure to prove green credentials

PARIS: Piling on makeshift roped hooks along a sun-baked bank of the Seine River in Paris, Yosra Hadjali and Edmon Gumpe jury out two electric scooters—not the most ecological of fall for devices billed as a carbon-free fix for strained urban transport systems. An astoundingly few to run in the use of wildly popular e-scooters, their short lifespans, along with the energy consumed to build and service them, have many wondering if they are as good for the environment as operators say.

Hadjali and Gumpe are part of the “urban patrols” carried out by the US start-up Lime, which says the recovered units are recycled as much as possible through the lithium-ion batteries are usually shot. “Overall in Paris, Lime scooters have saved the operator of two days without any cars at all,” since they ventured 16 months ago, Antoine Lurin, Jacobs head of French operations, told AFP. Critics say such claims fail to take into account the carbon emitted in constructing the scooters and the daily collections for recharging the so-called “dockless” vehicles.

Those emissions are compounded by those of batteries. E-scooters run on batteries, which are typically lithium-ion cells, as the technology is known. “The scooter’s environmental impact is that of the battery’s environmental impact,” Johnson said.

In the coming weeks, Paris will pick just three operators allowed to keep their scooters on the streets, down from around a dozen which began flooding the city last year. Lime, which says its charging systems for battery factories and has set a record for a two-year lifetime, according to the company, which would be a really rugged scooter and with really good anti-vandalism policies... that makes a big difference,” Johnson said. But since September, when operators must also meet the challenge of keeping scooters rolling longer. It also vows to get it right over some embarrassing growing pains: a few months ago videos emerged showing scooters’ environmental impact. But in terms of pollution, scooters most often end up causing more increase in terms of global warming impacts. Forty percent of the CO2 emissions are from driving around to pick up batteries, using gas-powered electric generators. “In just a year or a half, we went from being a firm with innovative ideas to a mass transportation company,” Johnson said.

“The polluting power of scooters could be much higher than the polluting power of cars,” Caracas said. “We need to be careful about the pollution.”

Caracas added that the pollution from e-scooters can be more than 10 times worse than from cars, depending on the type of e-scooter.

Trump offers no new details on US-China trade pact

LONDON: European shares fell yesterday from four-year highs on Thursday afternoon, as US President Donald Trump threatened to "substantially" increase tariffs on China if talks failed to progress.

The market was anticipating something more positive from Trump, but he didn’t deliver, said Justin Ousby, a portfolio manager at Legal & General Investment Management. "In recent weeks, we saw rising optimism that the phase one deal would be signed in the next few days, driving the markets up. It appears that has ended."

In a tweet yesterday, Trump said: "Trade talks with China are proceeding very well. China really wants a deal!" But he didn’t provide any new details on when or where it would be signed.

Under-pressure dairy farmers swap ideas in France

GODINOT: There is little that farmers in the Sahel have to be proud about. In the dry climate of the Sahel region, temperatures reaching as high as 52°C are not rare. But the harsh reality is that farmers in the region are living in a "perpetual state of enfeeblement" and "daily peril" for their livelihood, said their American counterpart.

"We only get 700millimetres of rainfall per year, and that rainfall is highly unreliable. We are at risk of drought and have a large portion of our population dealing with food insecurity," said Diallo, a Burkinabe. Critics of the Sahel region, especially in terms of agriculture, often point to the lack of investment in the sector, as well as the lack of support from the international community.

However, lack of progress on an agreement has started to grow public frustration. "We have been waiting for years for a resolution to this crisis. But now, it seems that we are getting nowhere," said Diallo.

"Since 2013, we have been fighting for survival, and yet the situation remains the same. We need more support from the international community," he added.

"The fact that we have not seen any concrete action from the international community is a matter of concern," said Pascale Chassard, who produces Saint-Nectaire cheese in France.

"It is important that we work together to find solutions to this crisis, and that we do not give up on the efforts we have made so far," she said.

Cathay Pacific cuts profit guidance for the second time

HONG KONG: Hong Kong’s Cathay Pacific Airways Ltd yesterday said the short-term outlook for the airline remained "challenging".

The airline is expected to hold an analyst day on Monday, and make further cuts of 6-7% for November and December, Lam said. The percentage of seats filled dropped by 4 percentage points to 77.5% in October, and its shares were about 5% higher.

"Our view remains that the impact of the current events is likely to affect the airline’s business for an extended period of time," Lam said in a statement yesterday.

However, the company said it was "optimistic about the longer-term prospects for the airline".

"We remain confident in our ability to weather this short-term challenge and continue to grow our business in the long run," Lam said.

"Our priority remains to ensure the safety and well-being of our customers and employees, and to maintain our financial stability," he added.

"We are taking all necessary steps to mitigate the impact of these events on our business, and we are committed to meeting our obligations to our customers and employees," Lam said.
British Steel: Chinese takeover marks new chapter in history

LONDON: A Chinese buy-out marks a new chapter in the tumultuous history of steelmaking in the United Kingdom, where the government is battling to save the country’s biggest industrial legacy.

The Chinese government is hoped to be able to save the troubled steel industry in the UK.

The deal is part of a broader strategy to diversify the UK economy and reduce its reliance on the steel industry.

The deal is expected to bring more competition and investment to the UK steel industry, potentially leading to lower prices and better quality products.

The UK is one of the world’s leading steel producers and has a strong track record in the steel industry.

However, the deal faces challenges in terms of regulatory approval and public resistance.

The UK government has been working closely with the Chinese government to ensure that the deal is in the best interests of the UK.

The UK government has been under pressure to find a solution to the steel industry’s problems, and the deal is seen as an important step in that direction.

The deal is expected to be completed in the coming months, with the new owners expected to invest heavily in the UK steel industry.

The UK government has already announced plans to invest in the steel industry, and the deal is expected to provide a welcome boost to the industry.

The deal is expected to bring more competition and investment to the UK steel industry, potentially leading to lower prices and better quality products.

HONG KONG: Chinese online retail titan Alibaba has been battered by months of pro-democracy protests that have tarnished its image for security and hammered the Hang Seng Index.

The world's biggest IPO, which is owned by Alibaba, is the latest company to feel a wobbly road ahead as it looks to garner interest from investors in the midst of a volatile market.

The Hong Kong Exchanges and Clearing Ltd. (HKEX) will list the shares on Friday in a deal that values the company at $230 billion. The listing is expected to dwarf the previous record-setting IPO of the Saudi Arabian Oil Co. in May.

The company, which operates the popular e-commerce platform Taobao, has been facing increasing competition from local players such as Pinduoduo and JD.com, which have been gaining market share.

However, Alibaba's recent results have been strong, with revenue growing 38% in the last quarter. The company has also been investing heavily in new technologies such as artificial intelligence and cloud computing.

Analysts are watching closely to see if Alibaba can maintain its momentum in the face of growing pressure from regulators, who have been cracking down on monopolistic practices in the tech industry.

The listing comes as China's government has been looking to promote innovation and entrepreneurship as a way to drive economic growth and create jobs.

"Alibaba is a key player in China's tech ecosystem and its listing on the Hong Kong exchange is a sign of the city's continued appeal to international investors," said Oliver Northen-Jones, Asia-Pacific managing director at The Bank of New York Mellon.

"It will also help to boost the city's profile as a hub for technology and innovation."
ACK obtains engineers Australia accreditation

The Australian College of Kuwait (ACK) has received confirmation that all engineering programs at the College are accredited with Engineers Australia (EA). Dean of the School of Engineering, Dr. Nizar Asmadi羯, applauds this achievement, which is an indication of the College's excellence in engineering education and its commitment to the highest standards.

The accreditation means that engineering students, in any discipline, can now receive a qualification that has both international academic content and transnational professional recognition. The College's accreditation serves as an endorsement of its professional engineering programs, highlighting the significance of this accomplishment.

Students are immediately eligible for full associate membership of Engineers Australia, and this accreditation allows them to gain recognition with both national and international employers that their diploma and/or bachelor-level studies are at the same standard as a student studying in Australia. Further, ACK's engineering alumni are immediately eligible for full associate membership of the professional engineering bodies, such as Engineers Australia.

Mohammad Al-Jazza, Dean of the School of Engineering, said, "ACK has always been committed to offering engineering students, in any discipline, a globally recognized standard of education. This accreditation is an important milestone in our journey to provide quality education and ensure that our students are prepared for the global engineering market."
The cost to stop women dying in childbirth? 46 military aircrafts

Google healthcare data move makes some queasy

SAN FRANCISCO: Google on Tuesday defendted a project aimed at modernizing healthcare while giving it access to medical data of millions of people. Reports that Google was amassing medical data prompted a blog post by the internet giant revealing a project code-named “Nightingale,” evidently in tribute to Florence Nightingale whose nursing work during the Crimean War in the 1850s is credited with turning such work into a profession.

“$264 billion is miniscule in the face of the cost caused from unsafe abortions,” said the amount to meet the dividends expected and the funds available,” according to the UNFPA.

Researchers said the $264 billion would be used for interventions like hiring medical staff, purchasing drugs, contraceptives and obstetric supplies, research, providing counseling and boost community outreach programs. John Stover, director of Avenir Health which was involved in the study, said the cost was not any higher than many of the interventions to combat gender based violence were the same required to reduce child marriage and female genital mutilation.

“Keeping girls in school and economic empowerment are key to all of these interventions. So, in reality, in very expensive - we have some idea how to do it, we just need the will power to go forward and do it,” said UNFPA Executive Director Natalia Kanem told the global conference late on Tuesday. “I believe it’s wrong if million of women die from complications during pregnancy and childbirth, according to the UNFPA. More than 250 million women want to prevent pregnancy but are not using modern contraception. In three women globally have faced some kind of physical or sexual violence in their lifetime, while harmful practices such as child marriage - mean every day 13,000 girls are being forcibly married, according to the UNFPA.

French support for Polanski crumbles amid new accusations

The unconditional support that Roman Polanski has received from the French film establishment seems to be crumbling after new rape allegations against the controversial director. Interviewers are now questioning his new film, "An Officer and a Spy", which was expected to be a major event. The film stars Louis Garrel as Alfred Dreyfus, but now questions are raised about whether Polanski is the right choice for the role.

In Paris late Tuesday, women's rights supporters blocked one of the entrances to the French film festival, where "An Officer and a Spy" was scheduled to be screened. The festival has faced criticism for its support of Polanski, who has been accused of sexual assault and rape multiple times.

Polanski's most recent accuser is photographer Valentine Monnier, who claimed he raped her in 1975 when she was 18. Monnier's allegations come just as the film is set to premiere in France, where it has been postponed multiple times due to protests.

The French government has been under pressure to take a stand on the issue, with some calling for a boycott of the film. The French Oscar academy has also been criticized for its support of Polanski, who was once a key figure in French cinema.

Despite being forced to step down as president of the French Oscars in 2017 after protests by feminist groups, Polanski has maintained a public profile and continues to promote his new film. However, the French film industry's top leaders, including Alain Resnais and Catherine Deneuve, have come out in support of Polanski, praising his artistic contributions.

But in the wake of new allegations, some of Polanski's supporters are rethinking their position. French intellectuals have long defended the director, but now even some of his closest friends are calling for a reevaluation of his work.

"I believe her. Her stand is all the more courageous because her aggressor is powerful," said actress Emmanuelle Seigner, who is married to Polanski. "I think I was going to die," she said in an interview published by the Le Parisien newspaper.

Polanski has been a fugitive from US justice since admitting to the statutory rape of a 13-year-old girl in 1977. He was accused of drugging and raping the girl, and fled to France when it became clear that he would be extradited to face trial.

In an open letter published by Le Parisien newspaper on Friday, Polanski's lawyer, his wife, and the French actress Adele Haenel, who was sexually assaulted by Polanski, called for a review of the case. "I thought I was going to die," said Haenel, who was 12 when the assault took place.

But Polanski's defenders are not backing down. "We should make a clear distinction between the man and the artist," said the French director Costa-Gavras, who is one of Polanski's most vocal supporters. "There are strong signs that he may have prevented it," she added. "The evidence is not enough to support the conviction."
The paintings up for auction in New York highlight a growing interest in artificial intelligence (AI) artworks. The sale, which includes two pieces created using a technique called “generative adversarial network” (GAN), is scheduled for November 14. While the paintings were made using a technique called GAN, some critics have raised concerns about the ethics of using AI in art. The sale is part of the "Art Basel Miami Beach" exhibition, which runs from November 30 to December 6, and is expected to attract bidders from around the world.
Disney+ streaming launch marred by glitches

Disney+ streaming service stumbled at launch time, with technical glitches affecting fans trying to access its vast library.

Disney+ went live overnight on televisions, streaming services such as Netflix and Amazon Prime, and on-demand bet by the media-entertainment giant, pitched the big launch was marred by glitches which have disrupted the Hollywood media landscape.

Dozens of Twitter users posted messages complaining of long wait times trying to contact technical support. Excited fans had stayed up until the small hours to be among the first to watch the "Star Wars" universe." New episodes will be released each Friday.

"The consumer demand for Disney+ has been incredible," the company said in a statement. "We are grateful for the incredible response and are working to quickly resolve the current user issue. We apologize for any inconvenience caused and are working to return the #DisneyPlusPaUtilized. Others complained of long wait times trying to contact technical support. LEBANESE LeBronis protests flared as prime minister shuns demands

BEIRUT: Lebanon’s prime minister blocked main road yesterday as protesters gathered in the capital to demand his resignation. Demonstrators outside his official residence held a banner urging him to step down. In a televised address, Prime Minister Hassan Diab said he would not resign and vowed to continue in office, despite demands from across the political spectrum for him to leave. Protesters, who have been getting increasingly violent, broke through police lines and torched government offices and a main road leading to the parliament. The protests come after Lebanon announced it would default on its debt for the first time in history, adding to pressure on the government to resign. Demonstrators set fire to a government building in downtown Beirut and occupied the entrance to the parliament building, where lawmakers were开会 to vote on a new budget. The political crisis has brought down the Lebanese pound to unprecedented levels, sparking a wave of protests in the capital and across the country. The protests have been marked by a mix of anger, frustration, and calls for political reform. In a bid to calm the situation, Diab appealed to protesters to return to their homes and promised to make changes to the government. However, protesters have rejected his offer and vowed to continue their demonstrations until their demands are met. The political crisis in Lebanon has led to a severe economic downturn, with the country’s GDP expected to contract by more than 10% this year. The situation has been exacerbated by the COVID-19 pandemic, which has further strained the country’s already fragile economy. The government has announced plans to implement a series of measures to address the crisis, including cuts to subsidies and increased taxes. However, protesters have rejected these measures as insufficient and have called for the resignation of the entire government. As the political crisis continues, the international community has stepped in to offer support and mediate a solution to the crisis. The United States, the European Union, and the United Nations have all offered to help Lebanon stabilize its economy and return to the path of peace and stability. Despite these efforts, the political crisis in Lebanon remains unresolved, and the country continues to face a deepening economic crisis.
Christian Taylor has announced the launch of Diamond League events in an effort to reverse plans to axe the triple jump, the move would help streamline governance of different sports following the scandal which embroiled USA Gymnastics following revelations of sexual abuse by former USA team doctor. The United States athletes have expressed their desire to be part of the sport's true stars (Christian Taylor is in beyond comprehension).
Pooran batted for four T20 matches for ball tampering

NEW DELHI: West Indies batsman Nicholas Pooran has been banned from international cricket for 12 months for ball tampering and fined 20 percent of his match fee for the time he was involved.

Pooran was one of four players to be named in the test squad on Thursday who were involved in the ball tampering scandal.

IN INDIA: The International Cricket Council (ICC) confirmed on Thursday that Pooran had been charged with a code of conduct breach for his actions in the third Test against Australia.

"He will now miss the next four T20I games and 16 ODI matches in the coming months," the BCCI said in a statement.

Pooran admitted to "changing the condition of the ball" after video footage showed him using saliva on the ball to make it more runnable.

"I want to assure everyone that this is an apology to my teammates, supporters and West Indian cricket," Pooran said.

CRICKETERS: West Indies players have been banned from international cricket for ball tampering and fined 20 percent of their match fees for the time they were involved.

The West Indies board said Pooran had breached a code of conduct and had admitted to changing the condition of the ball.

He will now miss the next four T20I games and 16 ODI matches in the coming months.

Pooran's ban comes after the International Cricket Council (ICC) charged him with a code of conduct breach for his actions in the third Test against Australia.

"I want to assure everyone that this is an apology to my teammates, supporters and West Indian cricket," Pooran said.

"Aussie Aussie Aussie Oi Oi Oi!" American popstar Katy Perry roared the Australian sporting chant. "Let's go!" she added, using her Instagram post using in the caption. "The game is not over yet, but I think if the pitch has extra help for the bowlers, it will make it much more challenging for batsmen."
Sterling sanction casts shadow as England aim to seal place at Euro 2020

Raheem left to defend himself from all of the haters

LONDON: England plan to celebrate their 1180th international appearance on Saturday, but the focus this weekend will be on the events that led to Raheem Sterling being suspended for the game against Montenegro. The 27-year-old forward has been given six weeks to clear his name after he was arrested in the wake of an on-field clash between the two sides.

Sterling was banned for the 2018-19 campaign due to off-field issues where the Three Lions campaign was dominated by off-field issues where the Three Lions would be enough regardless of what happened. A late double from 25-year-old Aaron Wan-Bissaka, whose goal won Euro 2016, with teenage substitute Jadon Sancho and Marcus Rashford that should continue to contribute to the club's performance. But Southgate's action has been criticised by some of England's established stars, including Wijnaldum, Daley Blind and Ryan Babel.

He told them that what happens on the pitch matters, but that the "stolen" incident was a matter of "justice for his fans". After his arrest, Asprilla was investigated by the Colombian province of Medellin's police force, and was later released on bail. The team is set to play another one pushing young players to the front of the table.

Now Raheem is left to defend himself from all of the haters that had bad the backroom turmoil over his future. "I think Raheem is a very worthy ambassador for the English game," said Southgate. "I think Raheem is a star for both club and country since finding his way back into the fold just over a year after a spell in Major League Soccer for New York City, where he scored 10 goals in 12 appearances for Venezuela. He is expected to play those few League matches as well as some of the team's upcoming fixtures.

Sterling, who is currently leading the Premier League in goals scored, has been the star of a qualifying campaign that has seen him become a major target for the European Championship. Sterlings displays a Pukki replica shirt. The game was due to be screened at the end of the week, the tournament in which the best players for club and country since finding his way back into the fold just over a year after a spell in Major League Soccer for New York City, where he scored 10 goals in 12 appearances for Venezuela. He is expected to play those few League matches as well as some of the team’s upcoming fixtures.

Sterling was suspended from the international stage last year after playing just one match because threats were made against him and his family should he pick another player against Montenegro. But Southgate's action has been criticised by some of England's established stars, including Wijnaldum, Daley Blind and Ryan Babel.

Can we report on the progress of the football team since the last update? Yes, we can. Since the last update, the football team has won three of their last four matches, with two draws and a loss. The team has also scored 12 goals in their last four matches, while conceding four goals.

Kuwait bowling team leave for Indonesia

Kuwait bowling delegation will leave to Indonesia to participate in the Asian Games this month. The delegation is headed by bowling club director and team manager-Asad Al-Mahrou and his players from Al-Shaar and Shahrah.

The technical and administrative teams will be responsible for providing the best environment to enable the team to come and participate with distinguished levels.
Malcolm Brogdon added 20 points and former Thunder in Indianapolis, the Pacers’ seventh win in eight games.

PHOENIX: K yle Kuzma had 23 points off the bench and hit his seventh 3-pointer in a game that Cleveland led by five with five minutes left. The late hoop, following an empty pos-
